

VISION

*Industry's First Performance Management
Technology Solution*

VISION Streamlines Service Provider Oversight and Category Management

Both Sponsor and CRO organizations struggle with managing their portfolio of service providers. This is primarily due to the absence of fit for purpose central category management technology. This means vendor managers must maintain Excel trackers and multiple system logins to find key information required to efficiently govern and measure the performance of their partners. The tool set inefficiencies are further compounded by resource constraints, resulting in poor visibility, oversight-related audit findings and increased organizational and execution risks.

VISION is the industry's first comprehensive vendor management solution uniquely crafted with input from pharmaceutical industry thought leaders and designed to efficiently manage complex vendor portfolios across multiple dimensions, including at the study, department, therapeutic area and category levels.

**Achieve > 90% reduction in current cost
of centrally managing vendors**

FEATURING...

- Category management
- Service provider governance
- Contract, Audit and Qualification Tracking
- Metrics/KPIs reporting
- Dynamic communication

Streamline ACCESS & COMMUNICATIONS
